

IPEC LTD

Systems Administrator

Job Title:	Systems Administrator
Job Type:	Full Time/Part Time
Location:	Manchester Science Park, Manchester
Education Level:	Bachelor's Degree or equivalent preferable
Salary:	DoE

Company Information

Independent Power Engineering Consultants (IPEC) was founded in 1994, bringing expertise and market leading products and services to the power industry by listening to customer needs and creating innovative, quality, technical solutions that are sustainable, reliable and long term.

IPEC has enjoyed sustained business growth, winning several prestigious innovation awards for new and original products which are now being sold to a world-wide market.

Working Culture

IPEC is a company founded on cooperation and team-work. It is a relaxed and open working environment allowing for the freedom of expression and creativity which is so important at the cutting edge of technology. It is a forward looking company dedicated to progressing scientific discovery and technological enterprise.

The Role

We are currently recruiting for the position of Systems Administrator. You will be a key member of the Product Development and Support teams ensuring that the operation of all IPEC IT is kept running efficiently and effectively. The Systems Admin role is integral to the smooth running of IPEC with customer data coming to centralised servers from around the world. We strive to ensure our customers are supported as well as their systems. The successful candidate will also have the opportunity to get involved with the development of our products providing support to both the

Manufacturing and Services teams with production and testing of systems as well as commissioning of these. With a global customer base, this can mean travelling around the world to help directly on the installation and commissioning.

The successful candidate will have experience working in a busy customer focused environment, we are looking for someone who is an enthusiastic individual with excellent communications skills and a proven track record.

Responsibilities

- Maintaining digital component of substation monitoring systems around the world.
- Developing solutions for customer's software requirements efficiently.
- Monitoring in-house servers.
- Assisting with installations both on-site and from the office.
- Some general office maintenance.

Required Skills

- Standard sysadmin software skills (Apache, BIND, DHCP, IP, Postfix)
- Linux (Debian).
- OpenVPN.
- Team development methodology (Agile,GIT).

Beneficial Skills

- PHP debugging.
- Perl/BASH scripting.
- Understanding of mathematical C.
- PostgreSQL.
- Electrical knowledge.

Training

There will be ongoing support, mentoring and training available for this role offered as part of IPEC's Professional Development Programme. If you feel you meet some but not all of the criteria but are

enthusiastic about the role, don't be discouraged from applying. The role can be adapted to the skills you offer and IPEC will support your professional development.

Benefits include: Company Pension Plan, Share Options and Annual Bonus Scheme. Flexible working and 25 days annual leave.

Apply: Send a covering email and up-to-date CV to: jobs@ipec.co.uk
