

IPEC LTD

Web Developer

Job Title:	Web Developer
Job Type:	Full Time
Location:	Manchester Science Park, Manchester
Education Level:	Bachelor's Degree or equivalent preferable
Salary:	£20,000 - £30,000/annum depending on experience

Company Information

Independent Power Engineering Consultants (IPEC) was founded in 1994, Bringing expertise and market leading products and services to the power industry by listening to customer needs and creating innovative, quality, technical solutions that are sustainable, reliable and long term. IPEC has enjoyed sustained business growth, winning several prestigious innovation awards for new and original products which are now being sold to a world-wide market.

Working Culture

IPEC is a company founded on cooperation and team-work. It is a relaxed and open working environment allowing for the freedom of expression and creativity which is so important at the cutting edge of technology. It is a forward looking company dedicated to progressing scientific discovery and technological enterprise.

The Role

We are currently recruiting for the position of Web Developer. You will be a key member of a small product development team producing industry leading technology. The customer websites provide the key interface for our customers and their data allowing them to make critical asset management decisions. As our principal web developer you will develop our technical website which presents scientific data and graph trends as well as internal support sites that allow us to easily interpret our data. Furthermore you will work closely with our product development manager to help develop our data, website and product connectivity strategy.

The successful candidate will be involved in taking our exciting new web based projects from prepared design concepts forward to live. We are looking for someone who is an enthusiastic individual with excellent communications skills and a proven track record.

Responsibilities

- Maintaining existing codebase, including troubleshooting bugs and adding new features.
- Take a customer driven approach to development, communicating with the IPEC team and external customers to help form user requirements.
- Actively introducing ideas which can help improve customer interaction with our websites.
- Managing and undertaking comprehensive testing of software code.
- Exploring and integrating new web frameworks, technologies and tools.

Key Requirements

- 3+ years web based development experience.
- Experience of working within a team of software developers.
- Strong knowledge of HTML5, CSS3 and JavaScript.
- Eye and appreciation for great design.
- Ability to develop across different browsers and platforms.
- Solid understanding of web standards and best practices.
- Experience with Git version control.

Desirable

- Experience with presenting scientific information in an intuitive and user friendly manner.
- Understanding of REST principles and experience of interfacing with RESTful APIs.
- Both Linux and Windows based software development experience.

Training

There will be ongoing support, mentoring and training available for this role offered as part of IPEC's Professional Development Programme. If you feel you meet some but not all of the criteria but are enthusiastic about the role, don't be discouraged from applying. The role can be adapted to the skills you offer and IPEC will support your professional development.

Benefits include: Company Pension Plan, Share Options and Annual Bonus Scheme. Flexible working and 25 days annual leave.

Apply: Send a covering email and up-to-date CV to: jobs@ipec.co.uk
